Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 June 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

In response to the amendment filed on 6/25/2004 all the amendments have been entered and the action follows:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-9 and 11-13 rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. (US 5717777) in view of Matsubashi (JP 04158434).

Art Unit: 2623

With respect to claim 1 Wong discloses the fingerprint authentication system and method that acquire two fingerprint images of a finger (see col. 1 last 4 lines to col. 2 first two lines wherein the first fingerprint is taken for enrolment and the second fingerprint is taken for authentication), computing image correlations, extracting from each said fingerprint image at least one contact parameter, and to authenticate the user to control the electronic device, (see col. 2, lines 1-15, wherein the fingerprint is taken and the set of points are extracted in order to allow or to disallow the access "control the electronic device") as claimed. However, he fails to disclose the fingerprint sensor to be incorporated in to a pointing device, as claimed. Matsubashi in pointing device "electronic device" for display device teaches, a pointing device having a fingerprint scanner for scanning a fingerprint, (see title of the invention page 3, and page 5 first paragraph). Therefore, it would have been obvious to one ordinary skilled in the art at the time of invention to combine the two references as they are analogous because they are solving similar problem of security. The feature of pointing device can be implemented in to Wong's system because Wong is use in the computer access and this modification secures the computer usage.

With respect to claims 2-9 and 11-13 the rejection is maintained and incorporated by references as set forth in the prior office action (paper # 12).

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. (US 5717777) in view of Toyoda (US 5999637).

With respect to claim 10 the rejection is maintained and incorporated by references as set forth in the prior office action (paper # 12).

Claims 14-27 are rejected for the same reasons as set forth in the rejection of claims 1-13, because claims 14-27 are claiming subject matter combinations of claims 1-13.

Response to Arguments

5. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
